

3 April 2024

To Huntly resident,

Western Composting Technology (WCT) invites you to discuss the proposed Huntly composting facility and any concerns you may have. We wish to work collaboratively with our neighbours and the broader Huntly community regarding these concerns.

We welcome you to visit the WCT Shepparton site to meet with our staff and tour the 16-year old composting facility. For your convenience, WCT will arrange a bus from Huntly to the Shepparton site . We are keen for your feedback on which days may suit you for a tour during the week starting 22 April 2024.

To express interest in the Shepparton site tour, or if you would like to meet with WCT staff in Huntly, please contact Jeremy Clifford from Sustainable Project Management on 0406 696 202 or at jeremy@sustainablepm.com.au.

Alternatively, contact John Wilson (WCT Operations Manager) on 0447 733 026.

To participate in the Shepparton Site tour please respond by 15 April.

From the team at Western Composting Technology.
